Background Discussion

The Work consists of the construction of a new 24-inch and 30-inch potable water main connecting the north and south Manatee County potable water service areas, running parallel to the future Fort Hamer Bridge. The project consists of approximately 2,800 LF of 30-inch HDPE water main installed via horizontal directional drill under the Manatee River and approximately 5,400 LF of 24-inch ductile iron pipe installed via open cut. In addition, several existing developments along the route will be connected to the new transmission main with new 6-inch and 8-inch piping. Formal, competitive sealed bid procedures were followed resulting in a total of five (5) bidders submitting a sealed bid for consideration.
