TO: All Interested Quoters
SUBJECT: Request for Quotes 17-0445GE
Utilities Generator Preventative Maintenance Services

ADDENDUM 2

Quoters are hereby notified that this Addendum shall be acknowledged on the Quote Form and made a part of the above named RFQ. Quotes submitted without acknowledgment of the Addendum will be considered incomplete.

The following items are issued to add to, modify, and clarify the quote and contract documents. These items shall have the same force and effect as the original RFQ document, and costs involved shall be included in the quote prices. Quotes to be submitted on the specified due date, shall conform to the additions and revisions listed herein.

1. **DELETE** Article C.02,, Item A.: Contractor Requirements, within Section C Scope of Work of the RFQ to "Provide required 'One-time' service on all units". The County will consider this an "as-needed" repair request to be invoiced at the labor rate as quoted and repair/replacement parts to be invoiced as specified.
2. **CHANGE** Article C.02,, Item B: Contractor Requirements, within Section C Scope of Work of the RFQ to read as follows:

B. Provide Scheduled Inspections

1. Provide **Semi-Annual** Service that includes at a minimum (April / May)

Everything in the annual service **minus**:

- Oil change with corresponding filter change.
- Fuel filter
- Transfer switch operation
- Oil testing with report copy sent to the County representative

3. **CHANGE** Article C.02,, Item C: Contractor Requirements, within Section C Scope of Work of the RFQ to read as follows:

Provide a 4-hour load bank test, on an “as required” basis per the County’s authorized representative. At the discretion of the County, a “reactive” (heat-based testing the generator to simulate the load) load bank test will be required every year during the three year span of the contract for the generators listed under Group 2 for Plants and Central Laboratory. Load Bank testing at the Plant sites will require a minimum of two (2) hours for the “transfer test”. “Resistive” (the use of high power resistors to simulate the load) testing is not allowed. The Contractor shall provide adequate equipment and materials to provide this testing. No standby generators will be required for any load bank test. All generator locations provide easy access to the generator for this test. Group 1 – Lift Station and Portable generator load bank testing will be done under the successful quoter’s time and material pricing on an “as-needed” basis.

4. **CHANGE** Article C.05 SERVICE REPORTS, Item B. Invoices and Payments on Page C-4 that the paragraph after item 8 will include a three year term for the agreement, not a five year term as in the original specification.

5. **CHANGE** Article D.02 Basis of Award (first paragraph) on page D-5 to read as follows:

Award will be made on an All-or-None Total Offer Per Group Basis to the responsive, responsible quoter having the lowest total offer per group listed on the Revised Quote Form. Quoters are required to quote on all items within a group to be responsive for that group. Quoters may quote either group or both groups.

6. **DELETE** the original Quote Form and **INSERT** the Revised Quote Form that is attached to this addendum.

The following questions have been presented by potential bidders:

1. **QUESTION:** Per Section C.02 Contractor Requirements A: can we change this requirement “change all belts, hoses, clamps, air filters, block heater hoses and clamps, coolant thermostats and thermostat gaskets, and replace coolant” from a one-time service to an as needed service where the repair would be estimated on a time and materials basis?

Response: The requirement will remain unchanged.

2. **QUESTION:** Per C.03 Description of work C Load Bank: It says return to normal operation. What if the unit fails the test and you cannot put the generator back into the auto position/normal operation. Will the county rent a generator from the bid winner or will the county supply their own generator? If the load bank fails, can the successful bidder still bill the entire contracted price for the failed load bank? Can the successful bidder bill the entire contracted price to re-load bank the generator?

Response: The Contractor is required to work with County staff to get the generator back into the auto ready position. The lift station division has portable generators that are available for their division if needed. The County will pay for each load bank test individually, pass or fail.

3. **QUESTION:** Per Section C.05 B Invoices and payments: Number 4 states that if parts or equipment are required for repair the county will pay the contractors cost without any mark up; receipts are required to verify the contractors cost. Can we put a markup on the equipment (rental equipment) that may be needed for repairs and a markup on any parts needed for the repairs?

Response: The requirement will remain unchanged.

4. **QUESTION:** Per C.05 Invoices and payments: Number 5 includes all hours actually on site (do not include travel time). On the previous bid we could charge for travel time, why is this being changed?

Response: The requirement will remain unchanged.

5. **QUESTION:** Per C.05 Invoices and payments: Number 7 does not charge for misc. supplies; parts must be itemized per item 4. Can you put a blanket cost for misc. cost per repair? This would include consumable products (lubricants/WD40, shop rags, petroleum absorbent pads, wire nuts, etc.).

Response: A “shop/miscellaneous supplies” surcharge or fee will not be allowed.

6. **QUESTION:** Per C.05 Invoices and payments: Number 8 regarding adding new stand-alone units. Newer units cost more due to newer filters and no aftermarket filters being available. Why are we to burden the cost for the county having a newer unit? Each new unit should be quoted separately on its own and added to the RFQ.

Response: The major and minor preventative maintenance services are separated on the Quote Price Form, so for newer generators with higher parts costs, the Quoter should be able to incorporate those costs into their quote price.

7. **QUESTION:** Per D.01 Qualifications for Quoters: States all certifications shall be current. You can only be current with these certifications if you are employed by that particular generator brand “Kohler, Generac, Cat, Cummins etc.” Therefore it makes it impossible for one company to be qualified to have current certifications for more than 1 generator brand at a time.

Response: The requirement will remain unchanged.

8. **QUESTION:** Per Section E Insurance and Bonding: On page 2, number 6 bid bond is not marked with an “x” and number 7 payment and performance bond is not marked with an “x” however on page 5 it shows bonding requirements. Is Manatee County requiring a bid bond and/or a payment and performance bond?

Response: The “X” marks the insurance items that are required. No bonding of any type is required for this RFQ.

9. **QUESTION:** Per the Quote Form for PM Service: On the first page, it lists generators 1-36 however it does not list all KW sizes. On the third page it lists generators 71-102 however it does not list all KW sizes. On the fourth page, it lists generators 105-106 and states "N/A" for the KW size. Are these generators or fire pumps listed on these pages?

Response: There are no fire pumps, the specification is all generator. Some KiloWatt ratings were not available at the time RFQ was issued.

They are as follows:

- Quote Item # 6: The Loop = 35KW
- Quote Item #7 Winn Dixie = 60KW
- Quote Item #28 30-EE = 60KW
- Quote Item #81 N7A = 40KW
- Quote Item #82 Fairway Imperial = 100KW
- Quote Item #83 Twin Rivers 1 = 150KW
- Quote Item #84 Lexington 1 = 150KW (not 50kw as listed)
- Quote Item #94 Heritage Harbour Master = 400KW
- Quote Item #97 University Groves 1 = 150KW
- Quote Item #101 University Groves 2 = 60KW
- Quote Item #105 Mills Elementary School = 30KW
- Quote Item #106 Harrison Ranch 1 = 200KW

10. **QUESTION:** Per the Load Bank Testing Cost Sheet: You only list the manufacturer and KW. To more accurately quote the county, can you please provide the voltage setting of each generator 1-60 on the load bank testing cost page?

Response: All Lift Station units are all 480/240. Attachment "A" to this addendum lists lift station and portable generator voltage. All Plant division generators are 480 volts except: Southwest Generators 1 & 2 are 4160 volts.

11. **QUESTION:** Per Exhibit A: All KW sizes are not filled out. Can these be filled out and can you also list the voltages of each generator?

Response: See the Responses to Questions 9 and 10.

12. **QUESTION:** Can we bill for freight? Can we pass of the freight and tax charges our company receives when obtaining a part or equipment for Manatee County? All freight and taxes we are charged will be listed on receipts we are required to provide with any purchases.

Response: The County will consider freight and sales tax as part of the Contractor's Cost to be paid with no markup.

13. **QUESTION:** We suggest that the County split the bid up from 500kw and below to 505kw and above. By splitting the bid up, you will get more competitive pricing, more bidders, and during times of emergency the benefit of having 2 companies helping rather than just one.

Response: The Revised Quote Form attached will reflect a split of the Quote Form into two groups: Group 1 for Lift Stations and the Landfill, Group 2 for Plants and the Central Lab. The Basis of Award has been changed above in this addendum.

14. **QUESTION:** Do the contractors need to provide a transformer for the “Load Bank” test?

Response: No.

15. **QUESTION:** Will the County consider removing the “Load Bank” testing from the cumulative quote tabulation for award purposes? It is not mandatory cost and represents a large portion of the RFQ total value.

Response: The requirement will remain unchanged.

16. **QUESTION:** Please identify the timing for the major and minor preventative maintenance services.

Response: The major PM service will be November/December. The minor PM service will be April/May.

END OF ADDENDUM 2

Quotes will be received at Manatee County Procurement, 1112 Manatee Avenue West, Bradenton, Florida 34205 until **March 24, 2017 at 3:00 PM.**

Sincerely,

Chris Daley CPPO, CPPB
Buyer Manager, Procurement Division

REVISED QUOTATION FORM

RE: RFQ 17-0445GE Utilities Generator Preventative Maintenance Services

We, the undersigned, hereby declare that we have carefully reviewed the quote documents, and with full knowledge and understanding of the aforementioned herewith submit this quote, meeting each and every specification, term, and condition contained in the Request for Quotes.

We understand that the quote specifications, terms, and conditions in their entirety shall be made a part of any agreement or contract between Manatee County and the successful quoter. Failure to comply shall result in contract default, whereupon, the defaulting contractor shall be required to pay for any and all re-procurement costs, damages, and attorney fees as incurred by the County.
