Any bidders seeking to be recognized as local businesses for purposes of this local business preference provision may be required by the terms of the bid announcement to certify they meet the definition of local business set forth in this section, and to register as a local business with the county in the manner prescribed by the county to facilitate the county's ability to track the award of contracts to local businesses and to allow the county to provide future notifications to its local businesses concerning other bidding opportunities.

ARTICLE 2 - PRELIMINARY MATTERS

Computation of Time: When time is referred to in the contract documents by days, it will be computed to exclude the first and include the last day of such period. If the last day of any such period falls on a Saturday or Sunday or legal holiday, such day will be omitted from the computation.

- 2.1 The Contractor must submit a proposed schedule of the Work at the preconstruction conference. The purpose of this schedule is to enable the Owner to govern the Work, to protect the functions of the local government and its citizens and to aid in providing appropriate surveillance. The Owner shall have the right to reschedule work provided such rescheduling is in accord with the remainder of terms of the contract. The schedule shall show, as a minimum, the approximate dates on which each segment of the work is expected to be started and finished, the proposed traffic flows during each month, the anticipated earnings by the Contractor for each month and the approximate number of crews and equipment to be used. The Owner, after necessary rescheduling and obtaining additional information for specific purposes, shall review and approve the schedule. The Contractor shall also forward to the Owner, as soon as practicable after the first day of each month, a summary report of the progress of the various parts of the work under the contract, in fabrication and in the field, stating the existing status, estimated time of completion and cause of delay, if any. Together with the summary report, the Contractor shall submit any necessary revisions to the original schedule for the Owner's review and approval. In addition, more detailed schedules may be required by the Owner for daily traffic control.
- 2.2 A Notice to Proceed may be given at any time within thirty (30) days after the effective date of the Agreement. The contract time will commence at the time specified in such notice. Contractor shall start to perform the Work on the date specified in the notice to proceed, but no work shall be done at the site prior to the date on which the contract time commences to run.
- 2.3 If at any time the materials and appliances to be used appear to the Owner as insufficient or improper for securing the quality of work required or the required rate of progress, the Owner may order the Contractor to increase his efficiency or to improve the character of his work and the Contractor shall conform to such an order. The failure of the Owner to demand any increase of such efficiency or any improvement shall not release the Contractor from his obligation to secure the quality of work or the rate of progress necessary to complete the Work within the limits imposed by the contract. The Owner may require the Contractor to remove from the Work such employees as the Owner deems incompetent, careless, insubordinate or otherwise objectionable, or whose continued employment on the Work is deemed to be contrary to the Owner's interest.
- 2.4 The Owner reserves the right to let other Contracts in connection with this Work. The Contractor shall afford other Contractors reasonable opportunity for the introduction and storage of their materials and execution of their Work, and promptly connect and coordinate the Work with theirs.

ARTICLE 3 - CONTRACT DOCUMENTS: INTENT, AMENDING, RE-USE

- 3.1 The contract documents comprise the entire Agreement between Owner and Contractor concerning the work. The contract documents are complementary; what is called for by one is as binding as if called for by all. The contract documents will be construed in accordance with the laws and ordinances of the state of Florida and Manatee County.

Should a conflict exist within the Contract Documents, the precedence in ascending order of authority is as follows: 1) Standard Printed Technical Specifications, 2) Special Conditions, 3) General Conditions and 4) Drawings. Note: Computed dimensions shall govern over scaled dimensions.

- 3.2 It is the intent of the Contract Documents to describe a functionally complete project (or part thereof) to be constructed in accordance with the contract documents. Any work, materials or equipment that may reasonably be inferred from the contract documents as being required to produce the intended result will be supplied whether or not specifically called for. When words which have a well-known technical or trade meaning are used to describe work, materials, or equipment, such words shall be interpreted in accordance with that meaning. Reference to standard specifications, manuals or codes of any technical society, organization or association, or to the laws or regulations of any governmental authority, whether such reference be specific or by implication, shall mean the latest standard specification, manual, code or laws or regulations in effect at the time of opening of bids, except as may be otherwise specifically stated. However, no provision of any referenced standard specification, manual or code (whether or not specifically incorporated by reference in the contract documents) shall be effective to change the duties and responsibilities of Owner, Contractor or Engineer, or any of their agents or employees from those set forth in the Contract Documents.
- 3.3 The Contract Documents may be amended to provide for additions, deletions and revisions in the Work or to modify the terms and conditions thereof in one or more of the following ways:
- 3.3.1 A Formal Written Amendment
 - 3.3.2 A Change Order
 - 3.3.3 A Work Directive Change
 - 3.3.4 An Administrative Contract Adjustment
- 3.4 In addition, the requirements of the contract documents may be supplemented and minor variations and deviations in the Work may be authorized in one or more of the following ways:
- 3.4.1 A Field Order
 - 3.4.2 Engineer's approval of a Shop Drawing or sample.

ARTICLE 4 - CONTRACTOR'S RESPONSIBILITIES

- 4.1 Contractor shall keep on the Work at all times during its progress a competent resident superintendent; who shall be the Contractor's representative at the site and shall have authority to act on behalf of Contractor. All communications given to the superintendent shall be as binding as if given to Contractor.

- 4.2 Contractor shall provide competent, suitable qualified personnel to survey and lay out the Work and perform construction as required by the contract documents. Contractor shall at all times maintain good discipline and order at the site. Engineer may require Contractor to furnish at Contractor's expense, additional data about the proposed substitute. In rendering a decision, Owner/Engineer and Contractor shall have access to any available float time in the construction schedule. In the event that substitute materials or equipment not included as part of the bid, but proposed after the effective date of the agreement, are accepted and are less costly than the originally specified materials or equipment, then the net difference in cost shall be credited to the Owner and an appropriate change order executed.

These stakes and marks shall constitute the field control by and in accord with which the Contractor shall govern and execute the work. The Contractor will be held responsible for the preservation of all stakes, marks and if for any reason any of the

- 5.3 The Owner shall have the right to take possession of and use any completed portions of the work, although the time for completing the entire work or such portions may not have expired, but such taking possession and use shall not be deemed an acceptance of any work not completed in accordance with the Contract Documents.

ARTICLE 6 - CHANGES IN THE WORK

- 6.1 Without invalidating the Agreement and without notice to any surety, Owner may, at any time, order additions, deletions or revisions in the Work. These will be authorized by a written amendment, a change order, or a work directive change. Upon receipt of any

such document, Contractor shall promptly proceed with the Work involved which will be performed under the applicable conditions of the contract documents (except as otherwise specifically provided).

- 6.2 Contractor shall not be entitled to an increase in the contract price or an extension of the contract time with respect to any Work performed that is not required by the contract documents as amended, modified and supplemented.
- 6.3 Owner and Contractor shall execute appropriate change orders (or written amendments) covering changes in the Work which are ordered by Owner, or which may be required because of acceptance of defective Work.
- 6.4 At any time Engineer may request a quotation from Contractor for a proposed change in the Work and within twenty-one (21) calendar days after receipt, Contractor shall submit a written and detailed proposal for an increase or decrease in the contract price or contract time for the proposed change. Engineer shall have 21 calendar days after receipt of the detailed proposal to respond in writing. The proposal shall include an itemized estimate of all costs and time for performance that will result directly or indirectly from the proposed change. Unless otherwise directed, itemized estimates shall be in sufficient detail to reasonably permit an analysis by Engineer of all material, labor, equipment, subcontracts, overhead costs and fees, and shall cover all Work involved in the change, whether such Work was deleted, added, changed or impacted. Notwithstanding the request for quotation, Contractor shall carry on the Work and maintain the progress schedule. Delays in the submittal of the written and detailed proposal will be considered non-prejudicial.

ARTICLE 7 - CHANGE OF CONTRACT PRICE

- 7.1 The contract price constitutes the total compensation (subject to authorized adjustments) payable to Contractor for performing the Work. All duties, responsibilities and obligations assigned to or undertaken by Contractor shall be at his expense without change in the contract price.
- 7.2 The contract price may only be changed by change order or by a written amendment. Any claim for an increase or decrease in the contract price shall be based on written notice delivered by the party making the claim to the other party. Notice of the amount of the claim with supporting data shall be delivered within ten (10) days from the beginning of such occurrence and shall be accompanied by claimant's written statement that the amount claimed covers all known amounts (direct, indirect and consequential) to which the claimant is entitled as a result of the occurrence of said event.
- 7.3 The value of any Work covered by a change order or of any claim for an increase or decrease in the contract price shall be determined in one of the following ways (at Owner's discretion):

- 7.3.1 Where the Work involved is covered by unit prices contained in the contract documents, cost will be determined by application of such unit prices to the quantities of the items involved.
 - 7.3.2 By mutual acceptance of lump sum.
 - 7.3.3 On the basis of the cost of the Work, plus a 20% Contractor's fee for overhead and profit. (Contractor shall submit an itemized cost breakdown together with supporting data.)
- 7.4 Either Owner or Contractor may make a claim for an adjustment in the contract price. The unit price of an item of unit price Work shall be subject to re-evaluation and adjustment under the following conditions:
- 7.4.1 If the total cost of a particular item of unit price Work amounts to 5% or more of the contract price and the variation in the quantity of the particular item of unit price Work performed by Contractor differs by more than 15% from the estimated quantity of such item indicated in the Agreement; and
 - 7.4.2 If there is no corresponding adjustment with respect to any other item of Work; and
 - 7.4.3 If a Contractor believes that it has incurred additional expense as a result thereof; or
 - 7.4.4 If Owner believes that the quantity variation entitles it to an adjustment in the unit price; or
 - 7.4.5 If the parties are unable to agree as to the effect of any such variations in the quantity of unit price Work performed.

ARTICLE 8 - CHANGE OF CONTRACT TIME

- 8.1 Contract time may only be changed by a change order or a written amendment. Any claim for an extension or shortening of the contract time shall be based on written notice delivered by the party making the claim to the other party. Notice of the extent of the claim with supporting data shall be delivered within fifteen (15) days from detection or beginning of such occurrence and shall be accompanied by the claimant's written statement that the adjustment claimed is the entire adjustment to which the claimant has reason to believe it is entitled as a result of the occurrence of said event.
- 8.2 The contract time will be extended in an amount equal to time lost due to delays beyond the control of Contractor. Such delays shall include, but not be limited to, acts or neglect by Owner or others performing additional work; or to fires, floods, epidemics, abnormal weather conditions or acts of God.
- 8.3 All time limits stated in the contract documents are of the essence.

ARTICLE 9 - WARRANTY, TEST/INSPECTION, CORRECTION

- 9.1 Contractor warrants (for a minimum period of three years or as otherwise stated herein) and guarantees to Owner that all work will be in accordance with the contract documents and will not be defective; that Owner, representatives of Owner, governmental agencies with jurisdictional interests will have access to the work at reasonable time for their observation, inspecting and testing (Contractor shall give Engineer timely notice of readiness of the work for all required approvals and shall assume full responsibility, including costs, in obtaining required tests, inspections, and approval certifications and/or acceptance, unless otherwise stated by Owner).
- 9.2 If any work (including work of others) that is to be inspected, tested, or approved is covered without written concurrence of Engineer, it must, if requested by Engineer, be uncovered for observation. Such uncovering shall be at Contractor's expense unless Contractor has given Engineer timely notice of Contractor's intention to cover the same and Engineer has not acted with reasonable promptness in response to such notice. Neither observations by Engineer nor inspections, tests, or approvals by others shall relieve Contractor from Contractor's obligations to perform the work in accordance with the Contract Documents.
- 9.3 If the work is defective, or Contractor fails to supply sufficient skilled workers, or suitable materials or equipment, or fails to furnish or perform the work in such a way that the completed work will conform to the contract documents, Owner may order Contractor to stop the work, or any portion thereof and terminate payments to the Contractor until the cause for such order has been eliminated. Contractor shall bear all direct, indirect and consequential costs for satisfactory reconstruction or removal and replacement with non-defective work, including, but not limited to fees and charges of engineers, architects, attorneys and other professionals and any additional expenses experienced by Owner due to delays to other Contractors performing additional work and an appropriate deductive change order shall be issued. Contractor shall further bear the responsibility for maintaining schedule and shall not be entitled to an extension of the contract time and the recovery of delay damages due to correcting or removing defective work.
- 9.3.1 If Contractor fails within seven (7) days after written notice to correct defective work, or fails to perform the work in accordance with the contract documents, or fails to comply with any other provision of the contract documents, Owner may correct and remedy any such deficiency. To the extent necessary to complete corrective and remedial action, Owner may exclude Contractor from all or part of the site, take possession of all or part of the work, Contractor's tools, construction equipment and machinery at the site or for which Owner has paid Contractor but which are stored elsewhere. All direct, indirect and consequential costs of Owner in exercising such rights and remedies will be charged against Contractor in an amount approved as to reasonableness by Engineer and a change order will be issued incorporating the necessary revisions.

- 9.3.2 If within three years after the date of completion or such longer period of time as may be prescribed by laws or regulations or by the terms of any applicable special guarantee required by the contract documents, any work is found to be defective, Contractor shall promptly, without cost to Owner and in accordance with Owner's written instructions, either correct such defective work or if it has been rejected by Owner, remove it from the site and replace it with non-defective work. If Contractor does not promptly comply with the terms of such instruction, Owner may have the defective work corrected/removed and all direct, indirect and consequential costs of such removal and replacement will be paid by Contractor.

ARTICLE 10 - SUSPENSION/TERMINATION OF WORK

- 10.1 Owner may, at any time and without cause, suspend the work or any portion thereof for a period of not more than ninety (90) days by written notice to Contractor, which will fix the date on which work will be resumed. Contractor shall be allowed an increase in the contract price or an extension of the contract time, or both, directly attributable to any suspension if Contractor makes an approved claim. therefore.
- 10.2 Owner may terminate the contract if Contractor commences a voluntary case under any chapter of the Bankruptcy Code or any similar action by filing a petition under any other federal or state law relating to the bankruptcy or insolvency; if a petition is filed against the Contractor under any chapter of the Bankruptcy Code or similar relief under any other federal or state law; if Contractor persistently fails to perform the work in accordance with the contract documents; if Contractor disregards laws or regulations of any public body having jurisdiction or the Engineer; or otherwise violates in any substantial way any provisions of the contract.
- 10.2.1 Owner may, after giving Contractor (and the surety, if there is one) seven (7) days written notice and to the extent permitted by laws and regulations, terminate the services of Contractor; exclude Contractor from the site and take possession of the work and of all Contractor's tools, construction equipment and machinery at the site and use the same to the full extent they could be used (without liability to Contractor for trespass or conversion); incorporate in the work all materials and equipment stored at the site or for which owner has paid Contractor but which are stored elsewhere, and finish the work as Owner may deem expedient. In such case, Contractor shall not be entitled to receive any further payment beyond an amount equal to the value of material and equipment not incorporated in the work, but delivered and suitably stored, less the aggregate of payments previously made. If the direct and indirect costs of completing the work exceed the unpaid balance of the contract price, Contractor shall pay the difference to Owner. Such costs incurred by Owner shall be verified by Owner and incorporated in a change order; but in finishing the work, Owner shall not be required to obtain the lowest figure for the work performed. Contractor's obligations to pay the difference between such costs and such unpaid balance shall survive termination of the Agreement.

- 10.3 If, through no act or fault of Contractor, the work is suspended for a period of more than ninety (90) days by Owner or under an order of court or other public authority, or Engineer fails to act on any application or fails to pay Contractor any sum finally determined to be due; then Contractor may, upon seven (7) days written notice to Owner terminate the Agreement and recover from Owner payment for all work executed, any expense sustained plus reasonable termination expenses. In lieu of terminating the Agreement, if Engineer has failed to act on any application of payment or Owner has failed to make any payment as aforesaid, Contractor may upon seven (7) days written notice to Owner stop the work until payment of all amounts then due.

No action, either at law or at equity, shall be brought in connection with any such claim, dispute or other matter later than thirty (30) days after the date on which Owner/Engineer has rendered such written decision in respect thereof. Failure to bring an action within said thirty (30) day period shall result in Engineer's decision being final and binding on the Contractor. In no event may any such action be brought after the time at which instituting such proceedings would be otherwise barred by the applicable statute of limitations.
- 11.2 Before bringing any action in court pertaining to any claim, dispute or other matter in question(s) arising out of or relating to the contract documents or the breach thereof, or Engineer's final decision, except for claims which have been waived by the making and acceptance of final payment, the Contractor shall first submit written notice(s) of contract claims to the Purchasing Director for a decision; the Contractor may request a conference with the Purchasing Director. NOTICE OF DE MINIMUS EXEMPTION Manatee County Pier Removal File No. 0295087-002-BE, Manatee County

Dear Mr. Spadoni:

The Department received your application for a de minimus exemption on April 9, 2009. As stated in your application, the project is to remove the existing pier structure to prepare the site for the construction of a new pier. The existing railing, precast tongue-and-groove slab system and stringer beams will be removed by cutting the fasteners between the components. The existing pile caps will be cut off so the existing piles can be removed. The existing piles will be removed utilizing jetting or vibration techniques, or will be cut off 18 inches below the existing bottom. All exposed reinforcing rebar will be cut and ground to remove any protrusions or sharp edges. In addition, miscellaneous pilings located beneath the pier, but not associated with the existing pier (i.e., remnants of an older structure), will also be removed. The removed concrete slabs and pilings will either be used as artificial reef material, according to a separate Department authorization, or placed in an approved solid waste disposal facility. If the material is to be deployed as an artificial reef, it will first be prepared to meet the requirements of the artificial reef authorization (such as removal of protruding rebar) before being placed within one of the County's existing, Department-approved artificial reef sites.

The project site is located between R-20 and R-21, in Section 29, Township 34 South, Range 16 East, Manatee County, in the Gulf of Mexico, Class III Waters.

The pier was closed to the public on February 24, 2009, due to the loose and flaking concrete that was falling from the side and underside of the pier, which has made it unsafe for public use. Although the County has closed the pier, it is not continually guarded to enforce the closure. Since the public can still access the pier, this demolition is a high priority for the County in terms of public safety.

Under normal conditions, the proposed activity is not expected to generate a noticeable amount of turbidity. However, if an obvious plume is observed and appears to be caused by the demolition activity, there could be a violation of state water quality standards and adverse resource impacts associated with the turbidity. In that case, the de minimus exemption is no longer valid, and a permit would be required before the project activities outline herein would be allowed to continue. The application for that permit would have to address the need to establish a mixing zone for turbidity and the potential impacts associated with the turbidity.

Activities in, on or over waters of the State require a regulatory authorization for construction and operation of the project, unless otherwise exempt by statute or rule. Activities that have a material physical effect on existing coastal conditions or natural shore and inlet processes, and that extend seaward of the mean high water line into sovereign submerged lands, are regulated as “coastal construction”, unless otherwise exempt by rule. Activities on sovereign submerged lands require a proprietary authorization. Works in waters of the United States also require federal authorization and **may** qualify for review by the state under the State Programmatic General Permit process. Your proposed application has been reviewed for these authorizations.

REGULATORY REVIEW – EXEMPTION VERIFIED

A project that affects surface waters is regulated under Part IV of Chapter 373, Florida Statutes (F.S.), and unless otherwise exempt by statute or rule, requires an environmental resource permit described in Rule 62-343.050(2), Florida Administrative Code (F.A.C.). However, Chapter 373.406(6), F.S., provides a de minimus exemption for activities that will have only minimal or insignificant individual or cumulative adverse impacts on the water resources. The Department has determined that the proposed pier removal activity meets this criterion, and would be exempt from the need for an environmental resource permit.

A project that may affect existing coastal conditions or natural shore and inlet processes on sovereign submerged lands is regulated under the coastal construction program, as specified in Chapter 161.041, F.S., and Chapter 62B-41, F.A.C. According to Rule 62B-41.004(2)(c), F.A.C., structures having de minimus impacts to the coastal system, i.e., insignificant and not of a substantial nature either individually or cumulatively, shall be exempt from the provisions of this Chapter. The Department has determined that the proposed pier removal activity meets this criterion and is, therefore, exempt from the need for regulatory authorization under the coastal construction program described in Rule 62B-41.005, F.A.C. Because the project is exempt from the need for an environmental resource permit and a regulatory authorization under the coastal construction program, the project does not require a joint coastal permit, as prescribed in Rules 62B-49.003 and 62-343.075(7), F.A.C.

Therefore, the Department hereby grants a de minimus exemption for the proposed activity under Chapter 373.406(6), F.S. and Chapter 62B-41, F.A.C.

The determination that your activity qualifies for an exemption does not relieve you from the need to comply with all applicable water quality standards during construction and operation. **Activities conducted under the above exemption must be conducted using appropriate best management practices and in a manner that does not cause water quality violations, pursuant to rule 62-302, F.A.C.** This determination shall not be valid if the project results in water quality violations or if the basis for the exemption is found to be materially incorrect.

The determination that your project qualifies as an exempt activity is based upon forms, drawings and documents provided to the Department as of April 9, 2009, and the statutes and rules that were in effect at that time. This determination is effective only for the specific activity proposed and may be invalid if site conditions materially change or if the governing statutes or rules are amended. In addition, any substantial alterations to the demolition plans or location of the project should be submitted to the Department for review prior to commencement of work, as changes may result in the need for a permit. **In any event, this determination shall expire after one year.**

This project shall be subject to the specific conditions listed below:

SPECIFIC CONDITIONS:

1. No water quality mixing zone has been authorized for this pier removal project. If an obvious turbidity plume is observed, the JCP Compliance Officer shall be notified immediately by phone at 850-414-7716 or by email at JCPCCompliance@dep.state.fl.us. Unless it is determined by the JCP Compliance Officer that the project can proceed without violating water quality standards, this exemption determination shall be revoked and an Environmental Resource Permit would be required to continue the pier removal project.
2. In order to avoid adverse impacts to marine turtles, the removal of the Manatee County Public Pier shall be started after October 31 and be completed before May 1. No operation, transportation or staging or storage of equipment or materials is authorized seaward of the dune crest or rigid coastal structure on the marine turtle nesting beach along the Gulf of Mexico, May 1 through October 31.

PROPRIETARY REVIEW – AUTHORIZATION APPROVED

The project is not exempt from the need to obtain the applicable proprietary authorization for activities that are on or over sovereign (state-owned) submerged lands, as described in Chapter 253, F.S., and Rule 18-21, F.A.C. The Department acts as staff to the Board of Trustees of the Internal Improvement Trust Fund (Board of Trustees), pursuant to Chapter 253.77, F.S. Under

this authority, the Department has reviewed the proposed project, at the proposed location, and has made the following proprietary determinations:

The pier removal activity qualifies for a letter of consent under Rule 18-21.005(1)(c), F.A.C., to conduct the activity on the specified sovereign submerged lands. This letter **constitutes proprietary authorization to perform this activity** as long as the work performed is located within the boundaries described in the application as of April 9, 2009, and is consistent with the attached General Consent Conditions.

STATE PROGRAMMATIC GENERAL PERMIT– NOT ELIGABLE

The State Programmatic General Permit IV (SGPG) program allows the State to process Federal authorizations for certain activities. The proposed activity, as outlined on your application and attached drawings, **does not qualify** for Federal authorization by the State under the SPGP, so a **separate** permit or authorization will be required from the U.S. Army Corps of Engineers. A copy of your application was sent to the U.S. Army Corps of Engineers (USACE) for review. The USACE will issue their authorization directly to you, or contact you if additional information is needed. If you have not heard from the USACE within 30 days from the date that your application was received by the Department, contact the nearest USACE regulatory office for status and further information. **Failure to obtain USACE authorization** prior to the demolition could subject you to federal enforcement action by that agency. This letter does not relieve you from the responsibility of obtaining other permits (Federal, State, or local) which may be required for the project.

NOTICE OF RIGHTS OF SUBSTANTIALLY AFFECTED PERSONS

This letter acknowledges that the proposed activity is exempt from permitting requirements in Part IV of Chapter 373, and Chapter 161.041, F.S. This determination is final and effective on the date filed with the Clerk of the Department unless a sufficient petition for an administrative hearing is timely filed under Sections 120.569 and 120.57, F.S., as provided below. Be advised that neighboring property owners and other parties who may be substantially affected by the proposed activity allowed under this determination of exemption have a right to request an administrative hearing on the Department's decision that the proposed activity qualifies for this exemption. If a sufficient petition for an administrative hearing is timely filed, this determination automatically becomes only proposed agency action subject to the result of the administrative review process. Therefore, on the filing of a timely and sufficient petition, this action will not be final and effective until further order of the Department. The procedures for petitioning for a hearing are set forth in the attached notice.

This determination is based on the information you provided the Department and the statutes and rules in effect when the application was submitted and is effective only for the specific activity proposed. This determination shall automatically expire if site conditions materially change or

the governing statutes or rules are amended. In addition, any substantial modifications in your plans should be submitted to the Department for review, as changes may result in a permit being required. In any event, this determination shall expire after one year.

The Department will not publish notice of this determination. **Publication of this notice by you is optional and is not required for you to proceed.** However, in the event that an administrative hearing is held and the Department's determination is reversed, proceeding with the proposed activity before the time period for requesting an administrative hearing has expired would mean that the activity was conducted without the required permit.

If you wish to limit the time within which *all* substantially affected persons may request an administrative hearing, you may elect to publish, at your own expense, the enclosed publication notice in the legal advertisement section of a newspaper of general circulation in the county where the activity is to take place. A single publication will suffice.

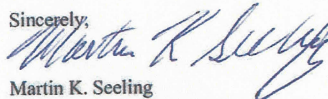

If you wish to limit the time within which any *specific* person(s) may request an administrative hearing, you may provide such person(s), by certified mail, a copy of this determination, including the publication notice.

For the purposes of publication, a newspaper of general circulation means a newspaper meeting the requirements of Sections 50.011 and 50.031, F.S. In the event you do publish this notice, within seven days of publication, you must provide, to the following address, proof of publication issued by the newspaper as provided in Section 50.051, F.S. If you provide direct written notice to any person as noted above, you must provide, to the following address, a copy of the direct written notice.
