BACKGROUND/DISCUSSION

- ✓ This procurement is to replace the piston pump process (multiple failures, expensive to maintain, multiple moving parts) with a new, more efficient flex tubing process. This unique roller design moves chlorine to the disinfecting chambers. With pressures up to 116 psi and flow rates to 385 gph, the DULCOflex DFB is an efficient choice for pumping abrasive chemicals with sheer sensitive polymers. The DFB pumps are equipped with a controller for precise batch metering.
- ✓ TriNova, Inc. has local presence in Manatee County, Prominent Fluid Control Products, which provides prompt service, a history of reliable equipment, and has held several training classes instructing the County's employees on operation and maintenance of this equipment.

If a vendor believes this item is not a sole source or noncompetitive procurement, Manatee County Purchasing Division requires prospective vendors provide information regarding their ability to supply the commodity or contractual services described prior to the date indicated for "date contract shall be awarded".
