

STORMWATER MANAGEMENT
 65TH AVE. W. PIPE REPLACEMENT
 FROM 12TH ST. W. TO 5TH ST. W.
 MANATEE COUNTY PROJECT NO. 6046000

- NOTES :**
1. Contractor shall locate and stake out all underground utilities (i.e. gas line) prior to any excavation activity. The gas line shall be staked out and top of pipe elevation provided at a minimum of every other lot line. This information shall be provided on the As-Built drawings.
 2. The contractor shall seek the recommendation of a professional structural engineer who is licensed in the State of Florida for protective measures, if any are needed, prior to any construction to protect existing pool structures or any other structures.
- Per Addendum # 1 dated December 2, 2008
1. Videotaping requirements as per FDOT Spec 430-4.48
 2. An as-built survey will be required for the final product. The survey needs to reference the contiguous property corners of all the affected lots. Any missing monumentation needs to be replaced as part of the scope of services for the project. The survey shall reflect the location of all new improvements, with the periodic distances from the located property corners.
 3. Prior to construction, another Public Information Meeting will be scheduled, with the contractor and Public Works staff providing scheduled information to the residents, as well as other pertinent construction information. Attendance at meeting will be considered part of mobilization.
 4. The residents will be instructed to move any structures. However, the contractor should be prepared to remove or relocate any structures as needed and should plan accordingly with their bid and specifically their line item for Miscellaneous Work and Clean Up. Best efforts need to take place to remove without destruction.
 5. There are no trees to be replaced as part of this project.
