BACKGROUND/DISCUSSION

The Utilities Department's enterprise application Ventex is used for various functions such as billing, repairs, and installations. Ventex required the addition of Automic Software's UC4 product for backups and scheduling jobs. The County has since purchased additional licenses for use in the Information Technology Department and Building and Development Services to support existing applications, thus standardizing a single application for these types of daily functions performed in the County's Information Technology environment.

Automic Software, Inc. is the vendor that owns, produces, and supports UC4 software. Resellers cannot sell product, upgrades, or services to existing customers. Manatee County has been a customer of Automic Software, Inc., formally AppWorx Corporation, since January 6, 2010.

If a vendor believes this item is not a sole source or noncompetitive procurement, Manatee County Purchasing Division requires prospective vendors provide information regarding their ability to supply the commodity or contractual services described prior to the date indicated for "date contract shall be awarded".
