MEMORANDUM

To: All Interested Quoters

Date: June 27, 2014

Request for Quotation #14-2180-OV

Subject: Repair / Refurbishment and / or Rewind of Submersible

Pumps and Electric Motors - ADDENDUM #3

Quoters are hereby notified that this Addendum shall be acknowledged on page <u>22</u> of the Quote Form and made a part of the above named quoting documents. Quotes submitted without acknowledgement of the Addendum may be considered incomplete.

The following items are issued to add to, modify, and clarify the quoting documents. These items shall have the same force and effect as the original quoting documents, and cost involved shall be included in the quote prices. Quotes to be submitted on the specified quote date, shall conform to the additions and revisions listed herein.

The deadline of June 10, 2014 to submit all inquiries concerning interpretation, clarification or additional information for this quote been extended through July 3, 2014. This deadline has been established to maintain fair treatment for all potential quoters, while maintaining the expedited nature of the Economic Stimulus that the contracting of this work may achieve.

Question 1

I'd like to submit the following questions for clarification for the above referenced bid: The prices for rebuilding a pump and motor cannot be bid at the same dollar amount because a pump has many more parts and requires many more hours to repair it compared to a motor, 2 different prices should be required for these 2 different things.

Are the prices for the rewinds and the prices for the reconditions to include all of the parts required to do the work in the price, or is this bid line item price just for the labor only and the parts are to be billed at the cost + percentage mark up? If the parts are to be included then the problem is that just bidding the lines by HP alone instead of brand name and model # would not allow for a realistic price, because depending on name brand, for example a 10 HP Hydromantic will have about \$ 150 worth of parts in it but the same 10 HP Flygt brand pump will have about \$ 1,500 worth of parts in it.

Response 1

The prices for the Rewind and the prices for the Reconditioning are for <u>labor only</u>. All parts / materials required for the Repair / Reconditioning and / or Rewind of Submersible Pumps (including motors) and / or Electric Motors (in order to be operational), are to be billed at the cost + percentage markup. A revised Quote Form is attached.

All Quote Replies are due July 11, 2014 at 4:00 PM

Request for Quotation #14-2180-OV

Repair / Refurbishment and / or Rewind of Submersible Pumps and Electric Motors

ADDENDUM #3 / Page 2 of 4

Question 2

The structure of this bid request is asking us to quote repair of pumps and electric motors as if they are equal and only defined by their HP rating. Pumps are much more expensive to repair than motors. The only wearable item on an electric motor are the bearings; pumps have more wearable parts, such as seals, gaskets, sleeve, wear rings, impeller, oils, etc. To further complicate this issue, not all pumps are equal. Here is an example... a 5hp electric motor recondition could run \$125-\$175 depending on the bearings size; to recondition a 5hp pump we could be anywhere between \$800 (Goulds pump) - \$2000 (Hydromatic pump) depending on the brand. As you can see, this makes it impossible to give a fair estimate based on your quote form structure.

My question is, can the motors, at the very least, be separated from the pump?

Response 2

The County has provided information to distinguish Electric Motors and Submersible Pumps. The County has provided detailed information relating to Horsepower, RPMs, and Voltage.

Question 3

1. Can the County please distinguish the voltages related to each group of motors being quoted. The County has single phase 230-volt motors, 3-phase 230-volts, 460-volts and 4160-volts.

The County would need at a minimal to distinguish between pumps and motors concerning its horsepower ranges. Then there is a significant difference in the speed of each horsepower.

Response 3

See Response 2.

Question 4: Please clarify Emergency Repairs and how is this to be priced?

Response 4:

As stated on <u>page 19 of the Request for Quotation</u>: "Any emergency repairs required which are a result of an unexpected and urgent request where health and safety of the public is at risk shall be completed and returned to the pickup location within forty-eight (48) hours after notification by the County. Failure to meet this requirement will be deemed materials breach of contract and may cause termination of this contract."

June 27, 2014

Request for Quotation #14-2180-OV

Repair / Refurbishment and / or Rewind of Submersible Pumps and Electric Motors

ADDENDUM #3 / Page 3 of 4

Response 4 (Emergency Repairs - continued)

Vendor shall provide an Hourly Rate for Emergency Repairs which shall include transportation, pickup and delivery, labor, equipment, teardown, testing, evaluation for the Repair / Recondition and Or Rewind of Submersible Pumps and / Or Electric Motors, returning equipment (fully operational) to its intended location.

All parts / materials required for the Repair / Recondition and / or Rewind of Submersible Pumps and / Or Electric Motors are to be billed at cost + percentage markup.

<u>Question 5:</u> Qualifications of Contractor: Does the Vendor's Shop require the shop to be UL Certified as an Explosion-Proof UL Facility.

<u>Response 5:</u> The Contractor or his Sub-Contractor is required to be a UL Certified Explosion-Proof UL Facility. A copy of the certification shall be provided with the Quote Response.

NOTE #1: Deletions:

Machine Work (page 18)

Delete: Last Line: Machine work shall be billed in increments of fifteen (15) minutes.

NOTE #2: Add under Technical Specifications:

Return of Materials:

Any and all replaced parts / materials shall be returned to the intended location to be disposed of by the County.

Note #3: Quote Form

The Quote Form is based on <u>estimated quantities for repair</u>. <u>Exact repair quantities cannot be determined at this time.</u> (2 total pages).

The Horsepower, RPMs and Voltages included with the Submersible Pumps and / Or Electric Motors are not limited to the attached and are provided for reference only. (15 total pages).
