- Although Custom Pumps & Controls, Inc., Tampa, FL is the apparent low bidder at \$225,523.00, the proposed electric motors show a service factor of 1.0 for 9 of the 48 locations where the submersible pumps will be installed. Technical Data provided by Custom Pump & Controls, Inc., is attached for further reference. The bid specification requirements state the electric motors are to meet a minimum service factor of 1.15. See attached for reference.
- Attached email dated May 28, 2009 from Mr. Jim Marble, Utilities Superintendent states he spoke with Mr. William Sagatys, Senior Engineering Specialist for Public Works who wrote the pump specifications for the Manatee County Utility Standards. Mr. Sagatys states that pumps performing with a higher service factor provide a cushion before the motor overloads. In other words, a motor with a service factor of 1.15 is less likely to overload or burn out than a motor with a service factor of 1.0. Mr. Sagatys' recommended we accept the pumps with the higher service factor as specified in our Invitation for Bid.
- The price difference between Barney's Pumps, Inc., (Homa Pumps) and Custom Pumps & Controls is approximately 1.2%
- The funding source for this contract is Utility Rates.
