1. Assembly Number Legend

   Single Arm:
   Arm Type – Pole Type = D# – S#
   = E# – T#

   Double Arm:
   First Arm Type – Second Arm Type – Pole Type = D# – D# – S#
   = E# – E# – T#

2. If an entry appears in columns "FAA" and "FBA", a shorter arm is required. This is obtained by removing length from the arm tip. For these cases the mast arm length shall be shortened from "FA" to "FAA" and the tip diameter shall be increased from "FB" to "FBA".

3. If an entry appears in columns "UAA" and "UCA", a shorter pole is required. This is obtained by removing length from the pole tip. For these cases the pole height shall be shortened from "UA" to "UAA" and the pole tip diameter shall be increased from "UC" to "UCA".

4. The foundations for Standard Mast Arm Assemblies have been designed based on geotechnical information provided by Dunkelberger Engineering and Testing, Inc. Values used in design:

   Soil Classification = Cohesionless (Fine Sand)
   Friction Angle = 28 Degrees (26 Degrees Minimum)
   Unit Weight = 37.6 lbs. / cu. ft. (assumed submerged)(Minimum)

GENERAL NOTES:

1. Work this sheet with the Signal Designer's "Mast Arm Tabulation". See "Mast Arm Tabulation" for special instructions that include non-standard Handhole location, paint color, terminal compartment requirement, and pedestrian features.

2. Work with Interim Standard Index No. 17743 and 17745.

3. Design Wind Speed = 130 mph.

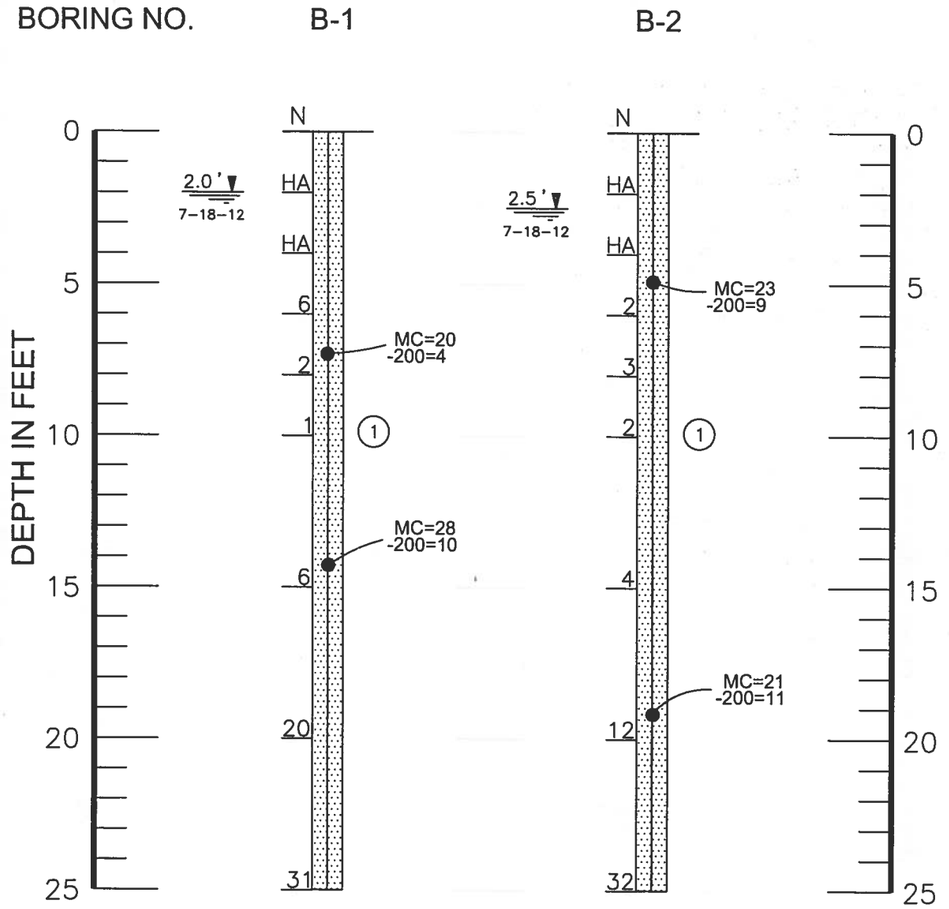
B-1 - STANDARD PENETRATION TEST BORING LOCATION AND NUMBER



GENERAL LEGEND

(1) Gray to dark brown fine SAND with trace silt to slightly silty and some shell (SP, SP-SM)

N – Indicates the number of blows of a 140 pound hammer, freely falling a distance of 30 inches, required to drive a 2-inch diameter sampler 12 inches (ASTM D 1586)

-200 – Amount Passing U.S. Standard No. 200 Sieve (%)

MC – Moisture Content (%)

HA – Hand auger 4 feet in order to avoid possible conflict with underground utilities

B-1 – Standard Penetration Test (SPT) Boring and number

SP – Unified Soil Classification System Group Symbol (ASTM D 2487)

2.0 / 7-18-12 – Depth of groundwater (feet) & date measured

NOTES

(1) Borings were drilled on July 18, 2012 using a Central Mine Equipment Model 55 (CME 55) drill rig.

(2) Strata boundaries are approximate and represent soil strata at each test hole location only. Soil transitions may be more gradual than implied.

(3) Groundwater depths shown on the subsurface profiles represent groundwater surfaces on the dates shown. Groundwater level fluctuations should be anticipated throughout the year.
