A responsive Proposal is one that follows the requirements of this Solicitation, includes all documentation, is submitted in the format outlined in this Solicitation, is of timely submission, and has the appropriate signatures as required on each document. The committee will consider all information submitted by each responsible and responsive Proposer; clarification information provided by Proposer; information obtained during the interviews, presentations, or demonstrations; feedback received from Proposer's references; and any other relevant information received during any investigation of Proposer to ascertain the ability of the Proposer to perform the Scope of Services as stated in this RFQ.

B.02 EVALUATION CRITERIA

The following evaluation criteria have been established for this RFQ.

Evaluation Criteria	Maximum Points
Proposer & Team's Experience	25

B.03 CLARIFICATIONS, INTERVIEWS, PRESENTATIONS, DEMONSTRATIONS

As part of the evaluation process, the evaluation committee will determine a list of those responsive and responsible Proposals that are deemed by the committee as having a reasonable probability of being selected for award (Short List). At a minimum, the evaluation committee shall conduct discussions with the Short List Proposers and may request additional information or clarification from Proposers for the purpose of further evaluation of (a) conformance to the solicitation requirements, (b) the abilities of the Proposer, and (c) understanding of the Proposal submitted. Additional information and clarification must be submitted by Proposer within the requested time-period.

Additionally, interviews, presentations or demonstrations may be conducted with Proposers as part of the evaluation process. Therefore, Proposers should make arrangements to attend, if invited.

The interviews, presentations and demonstrations are closed to the public to the extent permitted by law.

In the final evaluations, each evaluator will consider the information obtained from the proposals as well as the discussions and clarifications presented during the presentations. As part of the final evaluations, the initial technical evaluation scores for each short-listed firm, in each of the evaluation criterion, will be discussed by the evaluation committee and are subject to change.

This process may continue until a contract acceptable to the County has been negotiated or all Proposals are rejected.

SCOPE OF SERVICES

1.01 GENERAL INFORMATION AND BACKGROUND

Manatee County, a political subdivision of the State of Florida (hereinafter in this Scope referred to as County), is seeking proposals from qualified firms to provide Guaranteed Energy, Water, and Wastewater Performance Savings Contracts for the following project:

Project #1 – Study and implementation of a project to convert existing Sports Lighting Systems to LED lighting at various locations throughout the County.

1.02 PROJECT DESCRIPTION

The County is looking into options for converting our current athletic field lighting from the aging technology currently in use to new technology using LED lighting. As well as converting lights to LED, there are 15 fields that we are looking to add lighting to that would be considered new construction. Attached are park maps with field location and what needs to be done at each park, broken down to Retrofit, New Construction or Currently has LED lights (see Exhibits 3 and 4). As well as converting sports lights to LED we would like to convert parking lot lighting to LED at each park.

The main objectives and data for the project are provided below:

- a. Retrofit – Conversion of existing metal halide fixtures to LED fixtures and bulbs by using current light poles. Retrofit to meet IESNA recommended lighting levels for sports and recreational area lighting, to include uniformity and smoothness.
- b. New Construction – install and wire up new poles with fixtures and LED bulbs that meet IESNA recommended lighting levels for sports and recreational area lighting, to include uniformity and smoothness.
- c. All lamps shall be LED with a minimum CRI of 65 and a minimum color temperature of 5000K.
- d. All installed lighting must conform to the Outdoor Lighting Regulations from the Manatee County Land Development Code for measurable spill illumination limits.
- e. System – All lights should be controlled through an operating system that allows manual operation, remote operation and ability to set schedules for lights to turn on and off remotely. Any new system must be capable of interfacing seamlessly with the County's current scheduling software.
- f. The County currently uses Rec-Trac by Vermont Systems, Inc. for scheduling in connection with and Musco Lighting Control Link Systems at each park to set schedules for lights to turn on and off remotely.
- g. Parking Lot Lighting – Convert current Parking lot lighting to LED. All conversions must comply with state and local codes for outdoor lighting in the parking areas.
- h. All lighting should be covered under a warranty plan for a minimum of 10 years for retrofit and a minimum of 20 years for new installation to replace any issues that come after installation.

1.03 SCOPE OF SERVICES

The selected Proposer(s) (hereinafter referred to as PSC for Performance Savings Contractor) will enter into a contract(s) to provide investment-grade energy performance audit(s) for one or more of the projects listed above and provide a comprehensive energy efficiency and guaranteed savings report(s) which meet the requirements of Section 489.145 of the Florida Statutes.

Upon review and acceptance by the County, the County may negotiate a Guaranteed Energy, Water, and Wastewater Performance Savings contract for an initial period of up to twenty (20) years with the PSC(s) for the proposed energy, water, or wastewater saving improvements, and which may provide financing of the energy, water, or wastewater saving capital improvements.

The PSC must provide a guarantee that annual energy cost savings will meet or exceed the amortized costs of the energy-saving capital improvements. Improvements must result in a guaranteed minimum energy savings with payment to the PSC for services linked to the verified achievement of project savings.

1.04 ENERGY AUDIT CONTRACT

The PSC(s) shall perform an Investment grade energy audit, which means a detailed energy, water, and wastewater audit, along with an accompanying analysis of proposed energy, water, and wastewater conservation measures, and their costs, savings, and benefits prior to entry into an energy savings contract.

The scope of the energy audit shall include, but not be limited to:

Performance of technical analysis of each facility and energy audit to evaluate costs and savings of a variety of energy, water, or wastewater cost savings measures which may include:

- a measured reduction in the cost of fuel, energy or water consumption, or wastewater production;
- stipulated operation and maintenance savings;
- improvements in supplied utility systems, including, without limitation, revenue enhancements or reduction in net operating costs resulting from increased meter accuracy or performance; and
- identified capital savings, created from the implementation of one or more energy, water, or wastewater efficiency or conservation measures when compared with an established baseline for the previous cost of fuel, energy or water consumption, wastewater production, stipulated operation and maintenance, meter accuracy or performance, and identified capital costs.

Preparation of an Energy Audit Savings Report including:

- Detailed descriptions of significant long-term energy savings and operational changes recommended to be installed or implemented and prioritized as to greatest potential savings.
- Projections of energy and cost savings to be obtained as a result of the installation of the recommended energy conservation measures and appropriate criteria to be used to determine measurable savings and the method for verification. The savings calculations must utilize assumptions, projections, and baselines which best represent the true value of future energy

or operational savings for the facility, including accurate marginal cost for each unit of saving at the time the audit is performed; documented material and costs actually avoided; adjustments to the baseline to reflect current conditions at the facility compared to the historic base period; and calculations which account for the interactive effects of the energy conservation measures. A description of how utility tariffs were used to calculate savings for all energy conservation measures is to be included.

- Proposed plan for installing or implementing the recommended energy conservation measures, including all anticipated costs and estimated time frames associated with the installation and implementation.
- Detailed timetable for completing engineering and construction work for the recommended energy conservation measures.
- Specific financing arrangements and terms for the energy conservation measures project. There should be no upfront capital costs to the County and all audit costs should be included in the financing.

The technical investment grade energy audit results shall be to provide an engineering and economic basis for negotiation of a Guaranteed Energy, Water, and Wastewater Performance Savings Contract between the PSC and the County for the energy conservation measures discussed in the audit.

The County will independently evaluate the audit once it is complete. However, the County shall be under no obligation to negotiate a contract, and if it does negotiate, may contract for all or only some of the recommended energy conservation measures. No implementation of any recommended energy conservation measures shall commence prior to full execution of a contract between the County and the PSC.

1.05 GUARANTEED ENERGY PERFORMANCE CONTRACT

The County may, in its sole discretion, based on the energy audit report, negotiate and enter into a Guaranteed Energy, Water, and Wastewater Performance Savings contract with the PSC to design, acquire, fabricate and install the agreed energy conservation measures and provide training, commissioning, maintenance and monitoring, and all other specified services at the audited facility(ies).

Services shall include the training of the County's facility staff with respect to routine maintenance and operation of all improvements. Such contracts shall include an energy savings guaranty and comply with the requirements of Section 489.145 of the Florida Statutes.

A registered professional engineer shall review and approve all design work done under the Guaranteed Energy Performance Contract.

No equipment or energy conservation measure will be installed or implemented that will require the hiring of additional personnel by the County.

All drawings, reports and materials prepared in performance of the contract shall become the property of the County.

The PSC shall be required to obtain all necessary licenses and permits and shall comply with all applicable Federal, State and local laws. All work performed under the Guaranteed Energy, Water, and Wastewater Performance Savings Contract must be in compliance with all building codes and appropriate licensing standards.

The term of the Guaranteed Energy, Water, and Wastewater Performance Savings Contract will be based on the specific project requirements and subject to negotiation.

1.06 GUARANTEED ENERGY PERFORMANCE CONTRACT/DESIGN BUILD PHASE

Proposal shall be all inclusive beginning with the assembly of a professional design team & support staff to work closely with the owner's representatives on an as needed basis to insure the final design will function as desired.

Proposal shall provide all personnel, services, plans, & documents necessary during the pre-construction phase & as required to bring the agreed upon design to a permitted status. Upon the Design/Build team's receipt of all permits, it shall cause the Construction Phase to commence.

The Construction Phase shall be manned by a pre-selected team which prior to construction has attended some, if not all, of the later pre-construction meetings to familiarize themselves not only the project but the owner's representatives they will be closely working with to bring the project to a successful conclusion.

The Construction Phase shall be properly manned to ensure that the construction schedule is maintained at all times and any potential delays shall be conveyed to the owner's representatives as soon as they are discovered.

During construction weekly, on-site project meetings will be conducted by the Design/Build provider. These meetings shall have representatives from all entities involved in the Construction Phase and may including the owner's representatives, when required. The meetings shall be mandatory.

The Design/Build team shall at the end of the Construction Phase bring to the project all the required resources to quickly & efficiently complete all punch list items, provide to the owner instruction as required for all supplied equipment & devices & submit all typical close out documents &/or those the owner may request.
