SUBJECT: Invitation for Bid #13-1089-OV  
44<sup>th</sup> Avenue East – From U.S. 41 (1<sup>st</sup> Street) to 19<sup>th</sup> Street Court East  
Project Nos.: 334-6001060 and 319-6045661  
**ADDENDUM #3**

**Note #2: Response to Contractors Questions:**

**Question 1:** With regard to Question and Response 26, the quantity has been corrected. Thank you, however the issue of what is the County expecting from the Contractor has not been addressed. What is the scope of work for these 2 (two) items, are we to connect to the existing service wye and relay the entire service? Bid item U-26 pays for furnishing and installing the pipe, we need a definition as to what the scope of work for items U-24 and U-25 is. Please clarify.

**Response 1:**

The Utility sheets show several new sewer service connections. Please charge the new sewer service connections to bid item U24. Bid item U26 is to cover the cost of the length of pipe. Bid items U24 and U25 were provided to cover the associated costs of relaying the old services with the new services to the edge of the new Right-Of-Way, which include all fittings and connections to the existing service wye, if possible or a new wye, if needed.

**Question 2:** With regard to our having to apply to our insurance vendor to get a price for the Railroad Protective Insurance Policy, one of the questions we have to answer is what is the value of the work within 50 (fifty) feet of the railroad tracks. I am not sure if we are to include the estimated cost of work the railroad has included in the Agreement with Manatee County along with the value of the work we have to perform in this area. If we include the estimated cost the railroad shows in the Agreement along with the value of the work we have to perform it will make a considerable cost difference for this policy. Can we get some direction from this County on this? It seems to me that County should be providing their own policy to the railroad for the cost of the crossing work. Please clarify. Perhaps the County Attorney needs to answer this.

**Response 2:** In reply to the question received, Contractors are to provide only the value of Contractor's work within fifty (50) feet of the railroad tracks.

**Note #3 – Insurance**

Contractors, at their discretion, may contact the Insurance Manager at CSX Railroad to determine whether the 44<sup>th</sup> Avenue Project is eligible for inclusion under CSX's blanket Railroad Protective Liability Policy.
