Manatee County Code of Laws

BACKGROUND/DISCUSSION

The Manatee County Procurement Division has completed a due diligence review and intends to procure Water Management Program Services from Poolsure without conducting a competitive solicitation process for the following reasons:

- The Poolsure Water Management Program is the County's current system that provides effective chemicals to the County aquatic facilities for their splash pads, pools, and pump rooms to run within the requirements of required chlorine and PH levels.
- The County has been utilizing Poolsure Water Management Program Services since 2015, giving them experience and institutional knowledge of County practices and requirements that would take other companies time to acquire.
- A competitive solicitation process cannot reasonably be used, or, if used, will result in significantly higher administrative costs with an unknown outcome.

Based upon these and other factors, the County plans to standardize the Water Management Program Services to help mitigate unfounded issues that would force facilities to shut down and to reduce the County's liability.

Any company that believes it can provide this good/service, must submit detailed information about its good/service to the Manatee County Procurement Division at purchasing@mymanatee.org no later than January 28, 2021 for evaluation and consideration.
